Grow A Herb Garden In Pots

Quick Checklist - Grow A Herb Garden In Pots

Pick 4 herb types you want to grow.

- Cilantro
- Basil
- Oregano
- Mint

Buy the required items from your local garden center or online.

- Cilantro, Basil, Oregano, Mint seeds or seedlings
- Potting mix
- 4 Pots (10-inches H x 18-inches W)
- Slow-release fertilizer
- Liquid fertilizer

Pick a season to grow the herbs, either spring or fall.

Mix the slow-release fertilizer with the potting mix.

Fill the potting mix into the pots till 1 inch from the rim.

Place several seeds in the soil at a slight distance from each other.

Cover the seeds with ¼-inch of potting mix.

Grow A Herb Garden In Pots

Spray water to keep the potting mix moist till seeds germinate.

Place the pots in a location that gets 6-8 hours of indirect sunlight.

Every day check the moisture by sticking your finger 1 inch into the soil.

Water the soil well if it has turned dry.

Thin the seedlings if there are too many in the pot.

Add liquid fertilizer to the soil every two weeks.

Harvest the herbs when the plants grows 4-6 inches.
